ABOUT us

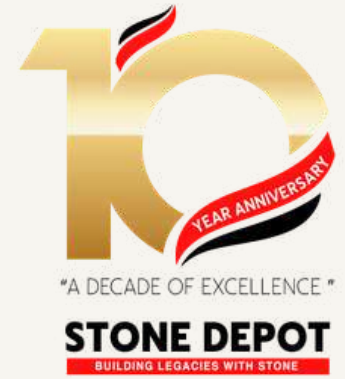

We focus on natural stone fabrication, sourcing high-quality slabs globally. Our advanced factory and expert team customize stone shapes and sizes to meet your needs.

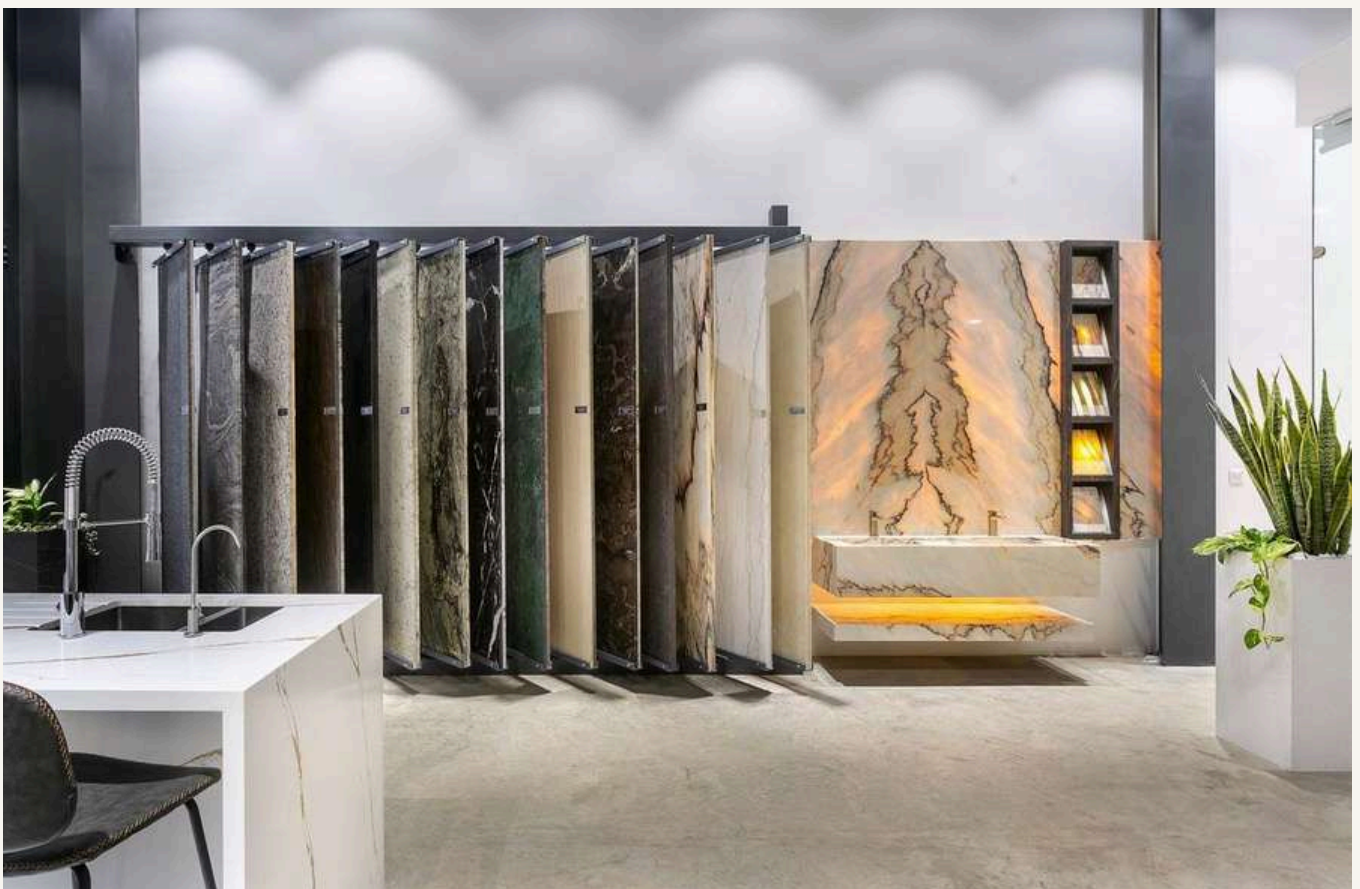

Our Story.

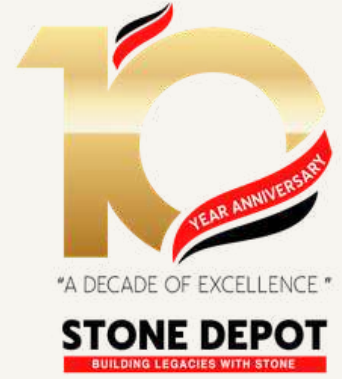

WHAT WE DO

Fabrication and distribution of natural stone products – Granite, Marble, & Quartz. **We are official distributors of Cosentino products in Ghana and Nigeria.**

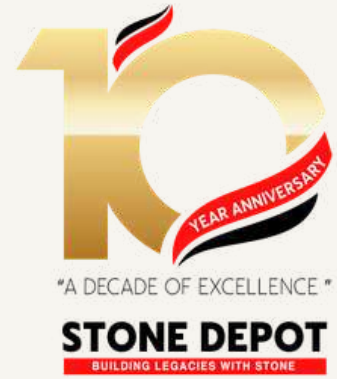

HOW WE DO IT

We fabricate and install your unique measurements and templates exactly as you want them. Our professionals have mastered this age old trade and guarantee you the precision, quality, and beauty your project deserves.

OUR PROCESS

SALES

Our devoted sales team is focused on delivering outstanding service. We collaborate closely with clients to grasp their unique requirements and provide customized solutions. From the first consultation to the project's conclusion, we guarantee a smooth and enjoyable experience.

FABRICATION

Our advanced fabrication facility boasts cutting-edge technology and is staffed by talented artisans. We focus on precision cutting, shaping, and finishing of both natural and engineered stone.

INSTALLATION

Our skilled installation team is committed to guaranteeing that your stone surfaces are installed flawlessly. We employ the latest installation techniques and follow industry best practices to achieve seamless and durable results.

NATURAL stones

MARBLE

Marble is a luxurious metamorphic stone formed from limestone under heat and pressure. Known for its elegance, it features unique veining patterns and comes in various colors, including white, gray, pink, green, and black, adding timeless beauty to any space.

GRANITE

Granite is a natural igneous rock formed by the crystallization of magma beneath the Earth's surface. Composed mainly of quartz, feldspar, and mica, it is known for its strength, durability, and unique appearance, making it a popular choice for countertops, flooring, and other surfaces.

LIMESTONE & TRAVERTINE

Limestone and Travertine are natural stones formed through sedimentary processes, offering unique beauty and versatility for various interior and exterior applications.

ENGINEERED

Quartz

Silestone is a brand of engineered stone, composed primarily of quartz (approximately 90–95%) mixed with resins, polymers, and pigments to create a durable and visually appealing surface.

It is widely used for countertops, backsplashes, and other interior surfaces. The result is a material that combines both beauty and strength, offering a practical solution for modern interiors.

PORCELAIN

Slabs

DEKTON®

designed by **COSENTINO**

Dekton is an ultra-compact porcelain surface that is carbon neutral and features an optimized manufacturing process. Its design draws inspiration from the elegance and aesthetics of natural stone, surpassing nature itself to deliver exceptional product performance. Available in a wide range of colors and sizes, Dekton shapes the future of architecture and design, crafting soulful spaces where beauty and functionality harmoniously coexist.

TERRAZZO

Terrazzo is a durable, aesthetically versatile composite material made from chips of marble, quartz, granite, or glass set in a cement or resin binder. Traditionally used for flooring and wall treatments, it is polished to a high-gloss finish, showcasing a colorful mosaic. This ancient Italian technique has gained modern popularity for countertops and decorative objects. Its blend of functionality and artistic expression, along with eco-friendly attributes, makes terrazzo a favored choice among contemporary designers and architects, adding elegance and creativity to both residential and commercial spaces.

BRAND AMBASSADOR

Tap Here

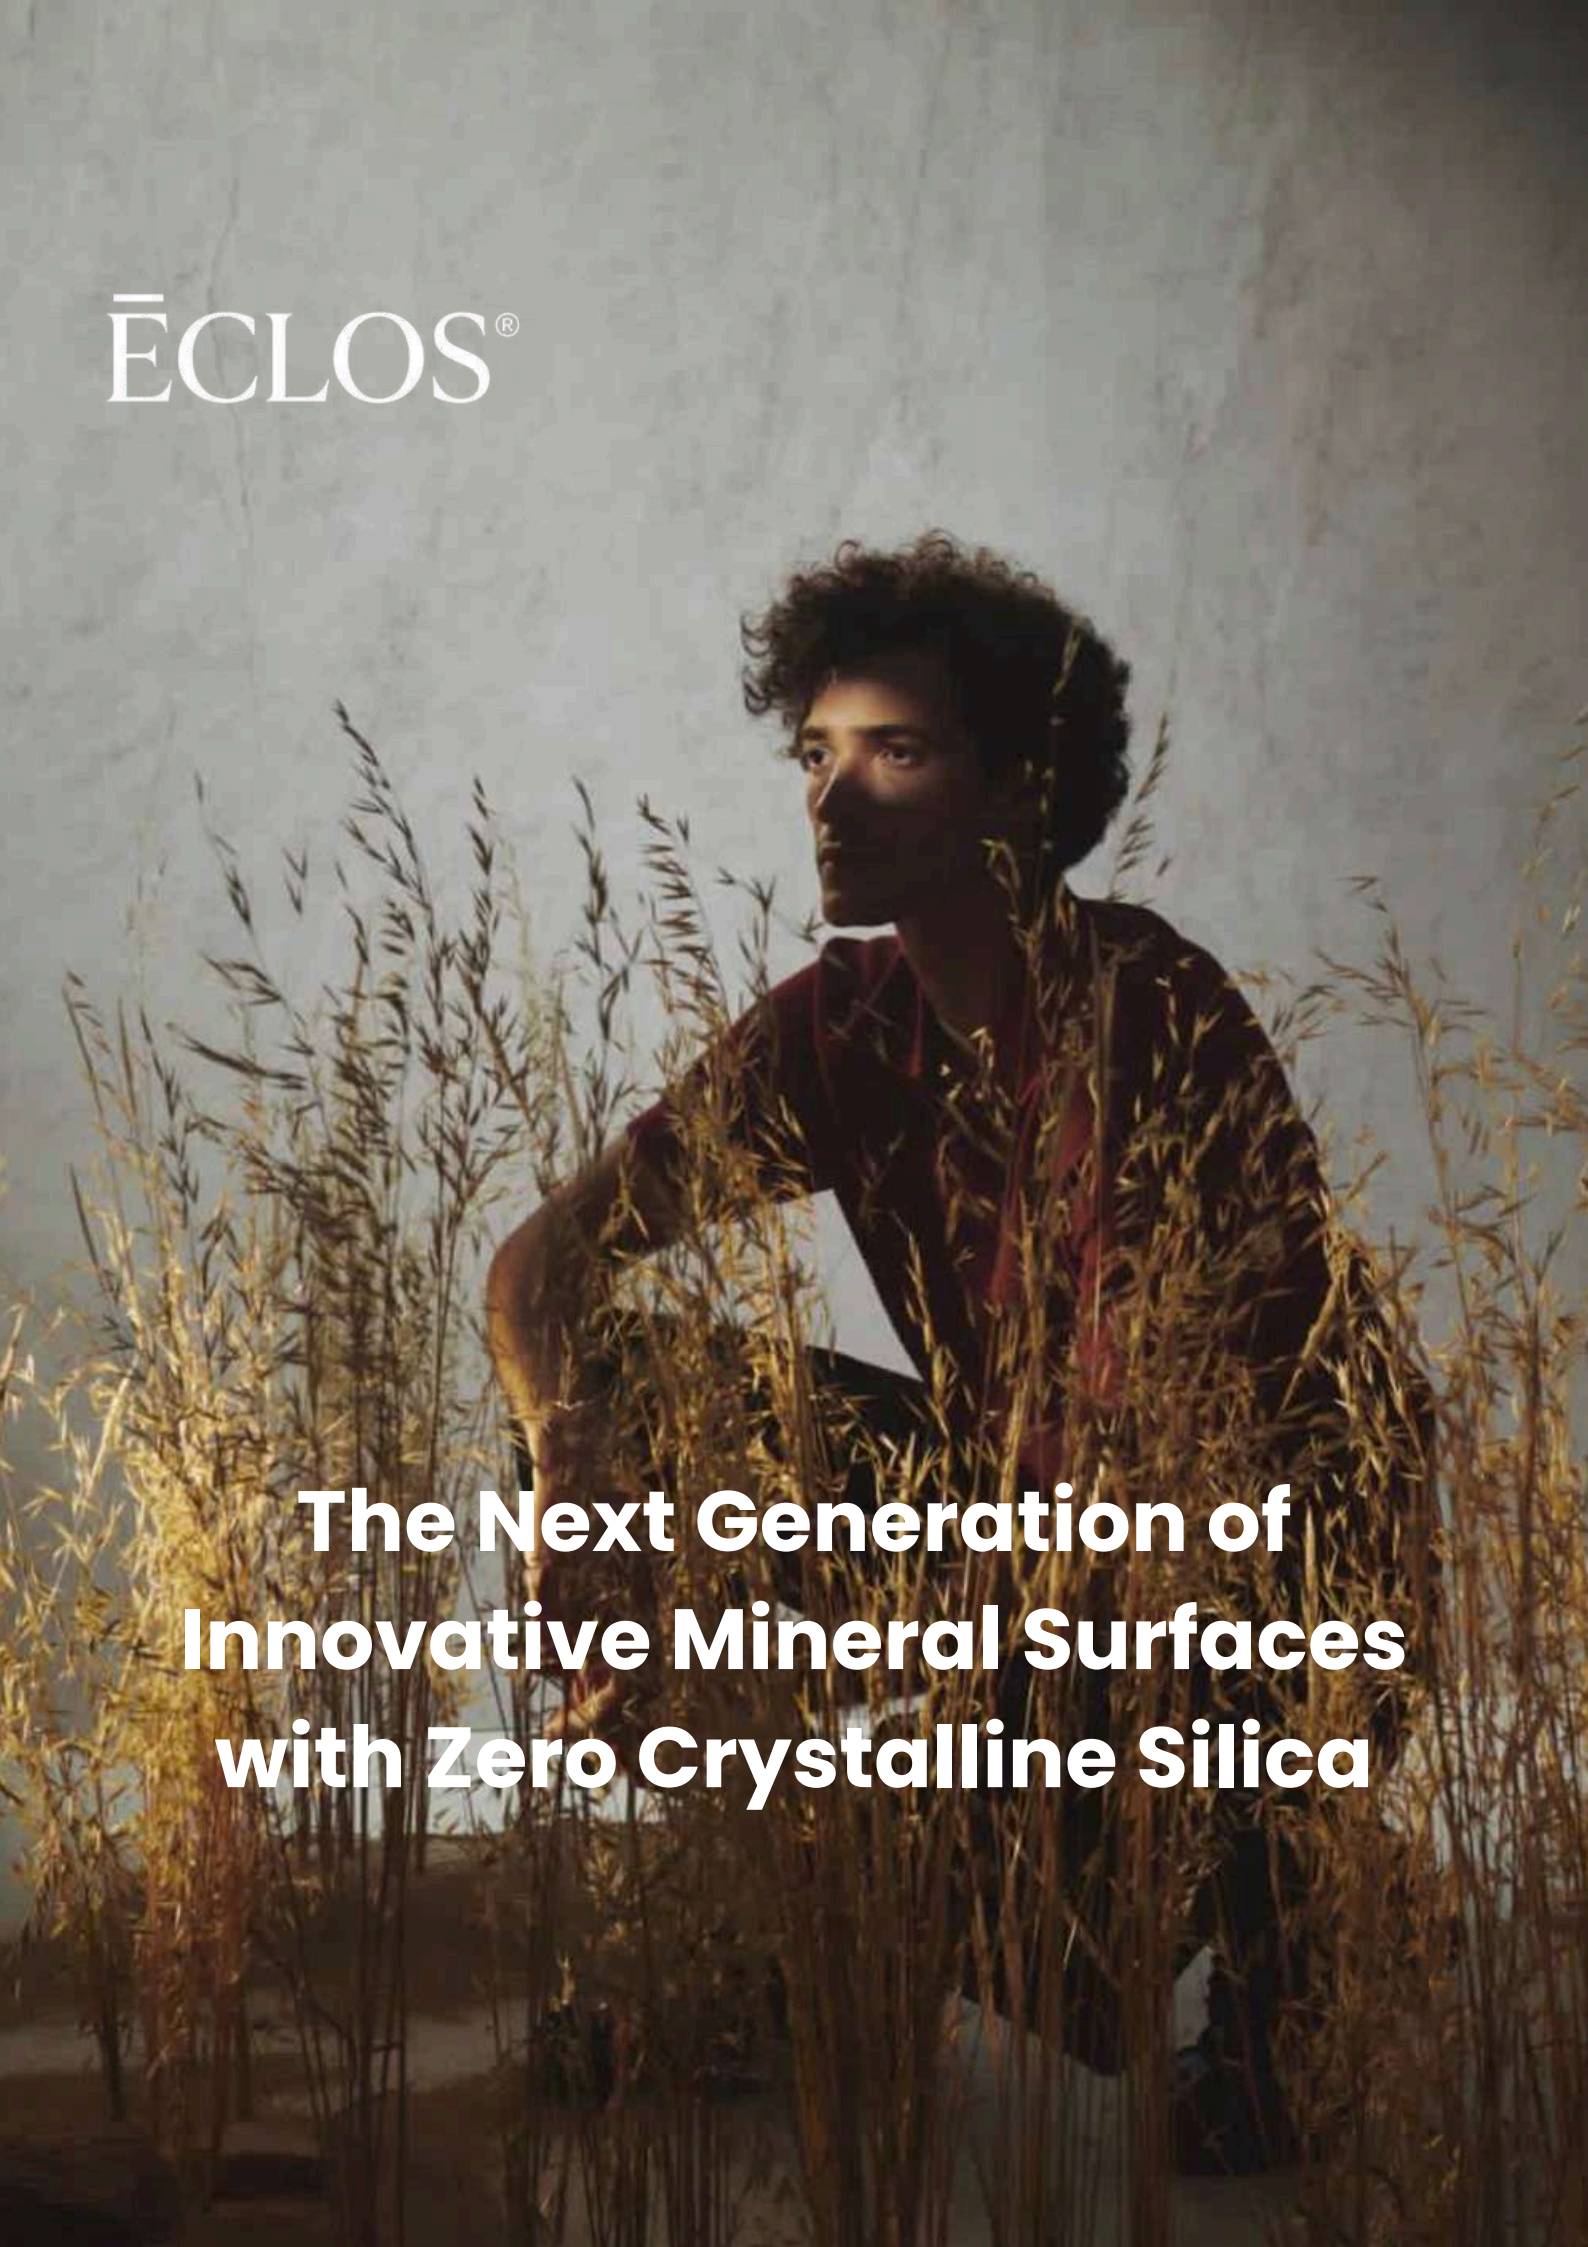

A woman with long dark hair and a white forehead mark is looking upwards. She is wearing a red long-sleeved top and a gold vest. She is also wearing large hoop earrings and red gloves. The background is a textured, brown wall. There are some dry grasses in the foreground.

COMING SOON

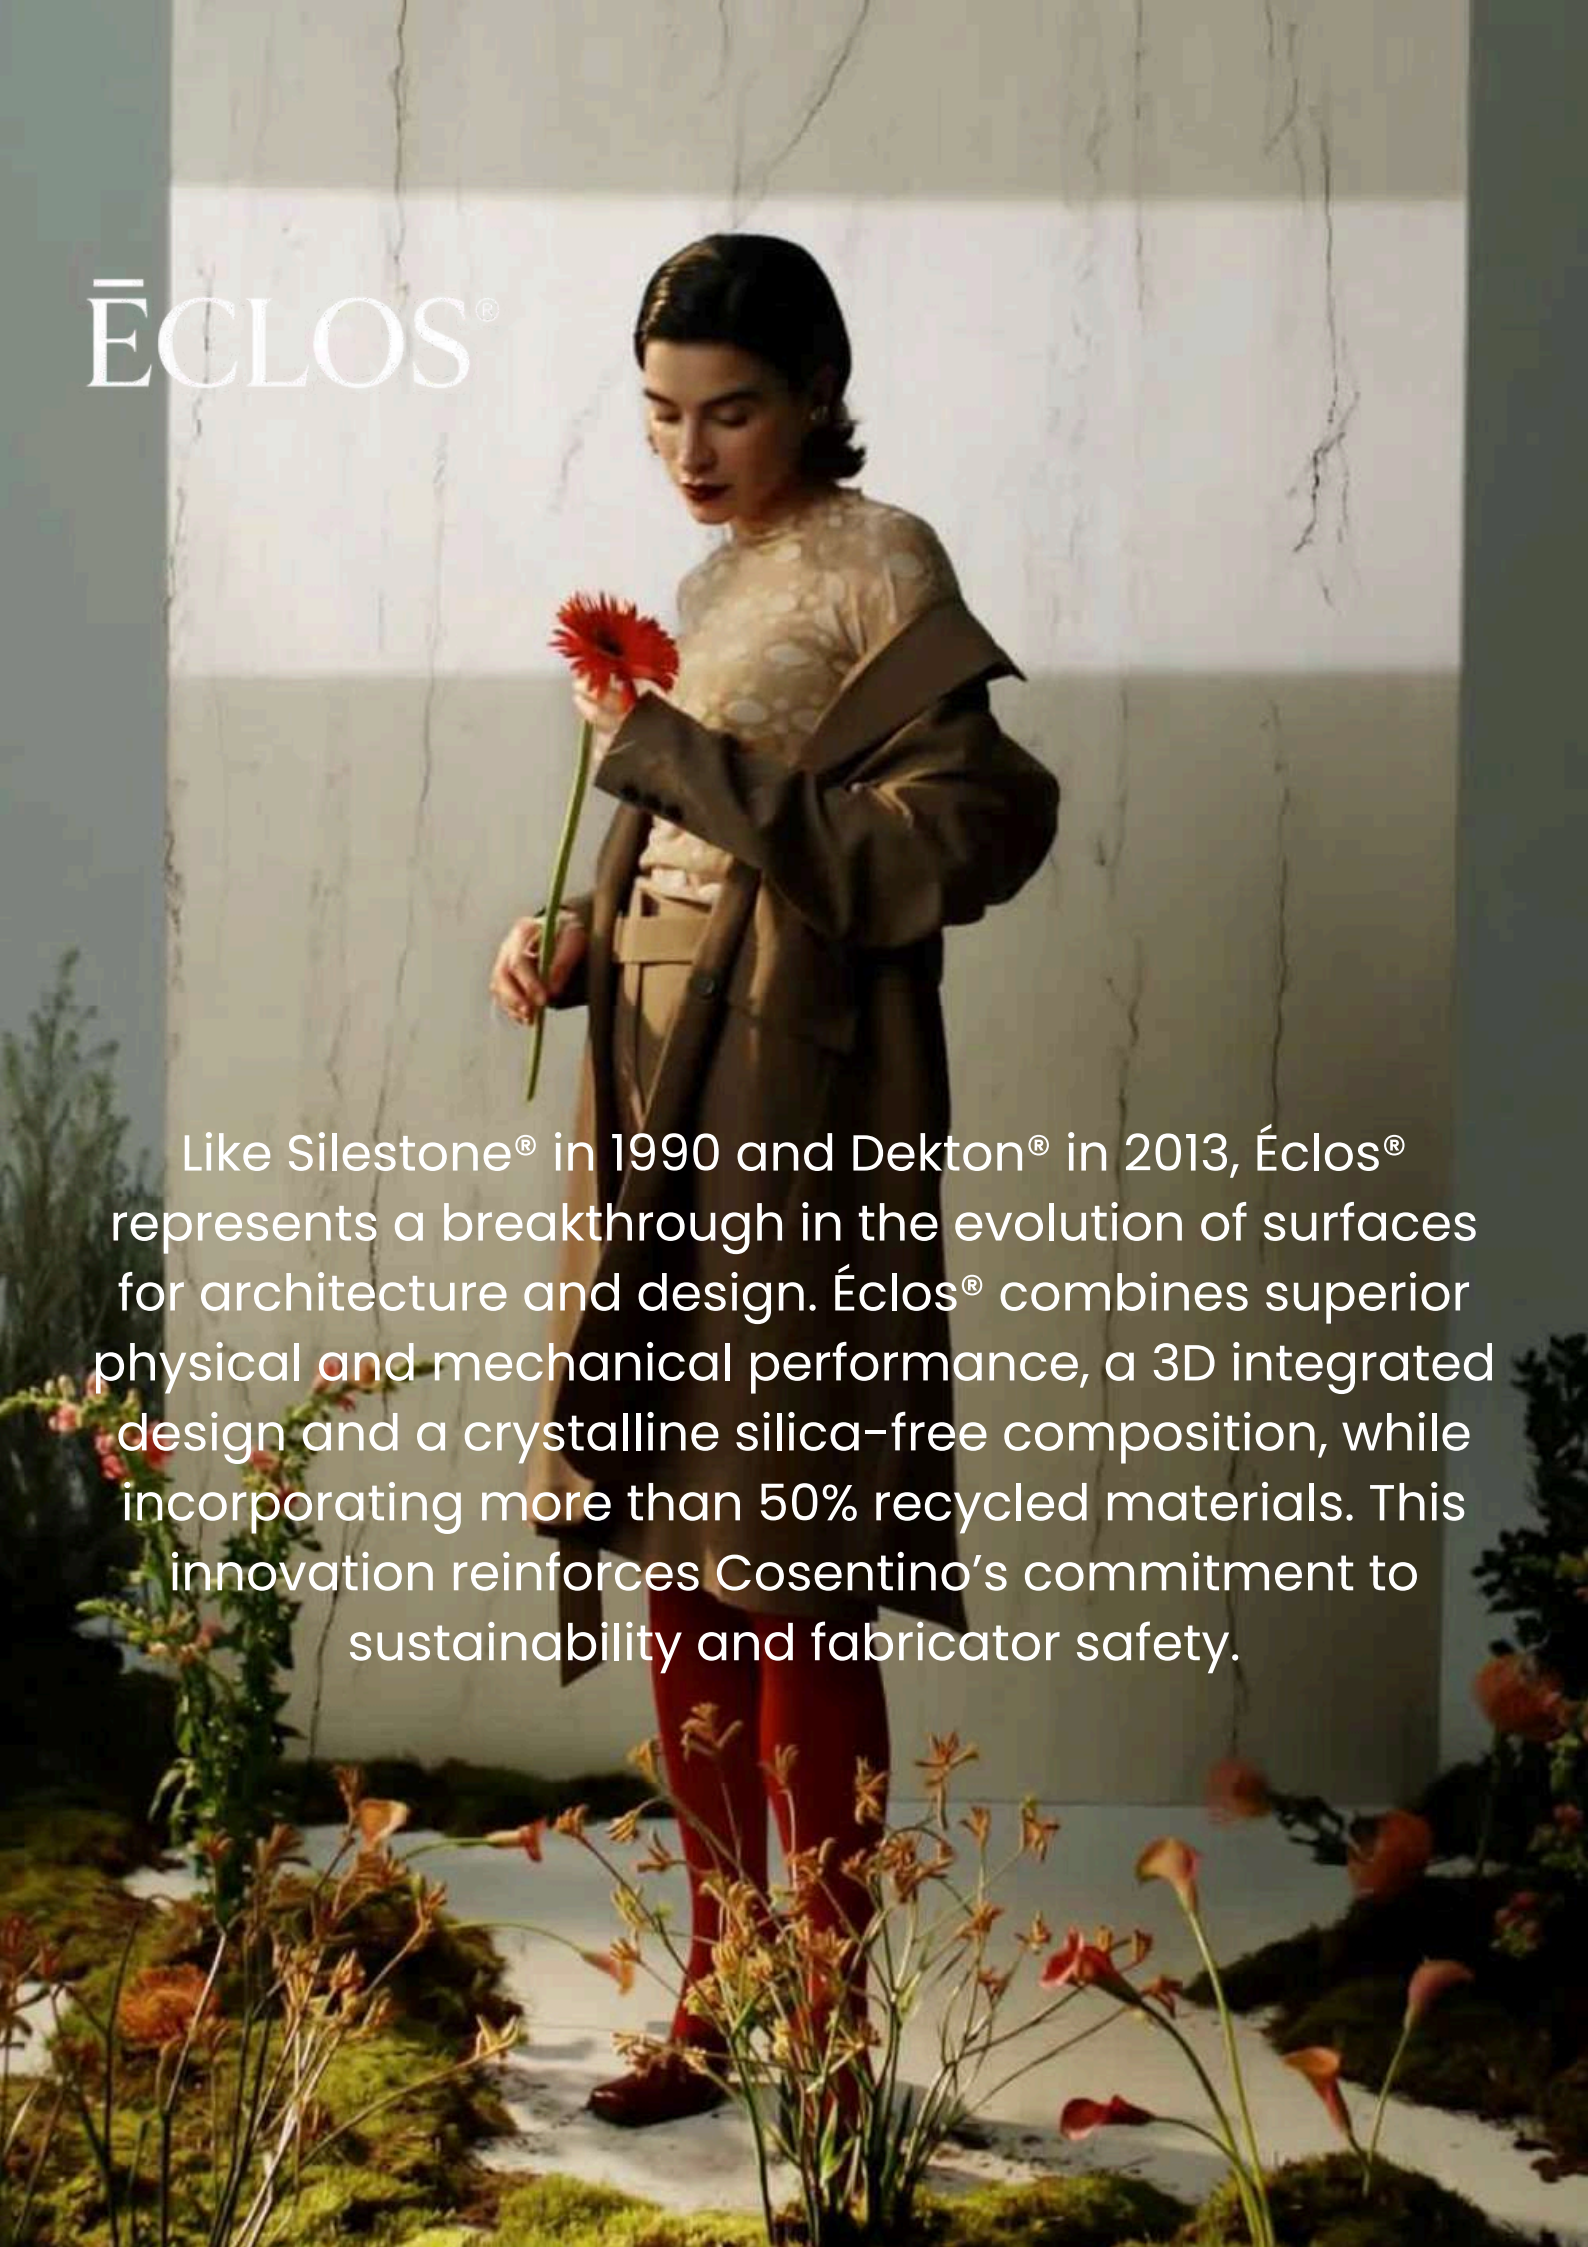

ÈCLOS®

by COSENTINO

A man with dark, curly hair is standing in a field of tall, golden-brown grass. He is wearing a dark, short-sleeved shirt and is holding a white rectangular object, possibly a piece of paper or a tablet, in front of him. The background is a soft, out-of-focus landscape with a light sky. The overall mood is artistic and natural.

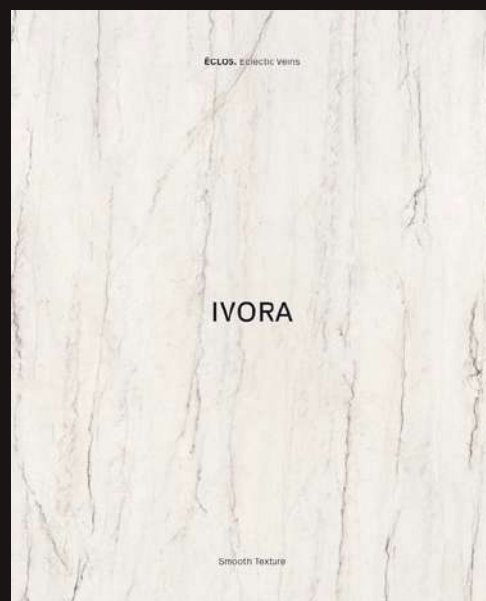

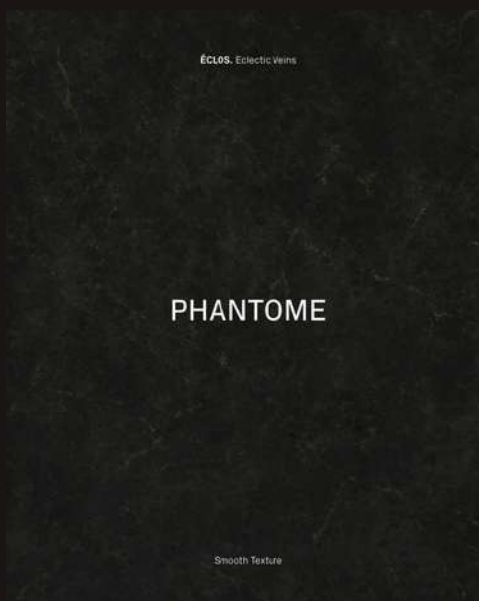

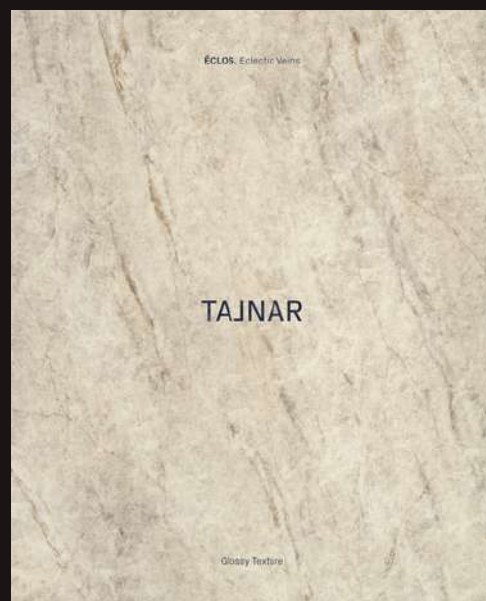

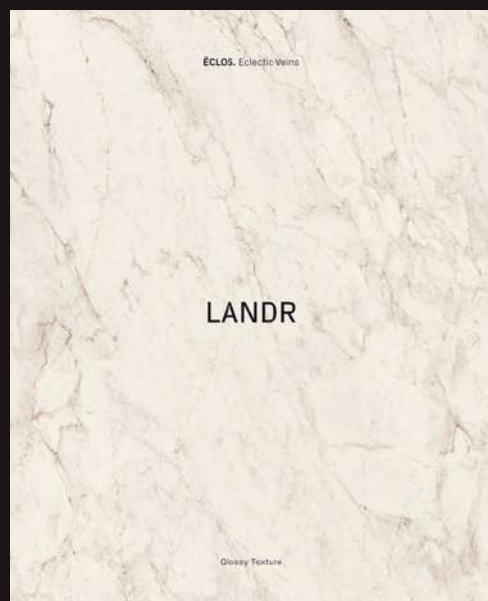

ĒCLOS®

**The Next Generation of
Innovative Mineral Surfaces
with Zero Crystalline Silica**

ÉCLOS®

Like Silestone® in 1990 and Dekton® in 2013, Éclos® represents a breakthrough in the evolution of surfaces for architecture and design. Éclos® combines superior physical and mechanical performance, a 3D integrated design and a crystalline silica-free composition, while incorporating more than 50% recycled materials. This innovation reinforces Cosentino's commitment to sustainability and fabricator safety.
